

I have submitted my name to my state's "No Call" list to help ensure my family's privacy. I find it truly offensive that an unelected agency of the federal government, thinks it has the power to override laws passed by my state legislature, which was elected. I do not now nor ever will believe that telemarketers have a Constitutional right to call me even though I have made it known through my state Attorney General that I do not wish to receive their calls. The U.S. Constitution guarantees the people the right to Free Speech, not the right To Be Heard. The telephone is not the only medium available to marketers. Radio and TV media as well as the mail and printed publications are all additional and effective ways to speak to the general population. In short, BACK OFF!!!!!!!!!!
